## Time and Space Complexity

## **Assignment Questions**

## **Assignment Questions**

```
Q1. What is the time, and space complexity of the following code snippet?
                                                                                                     (Easy)
int a = 0, b = 0;
for (i = 0; i < N; i++) {
    a = a + i;
for (j = 0; j < M; j++) {
    b = b + j;
                                                                                                     (Easy)
Q2. What is the time complexity of the following code snippet?
int a = 0;
for (i = 0; i < N; i++) {
    for (j = N; j > i; j--) {
        a = a + i + j;
}
Q3. What is the time complexity of the following code snippet?
                                                                                                 (Medium)
int i, j, k = 0;
for (i = n / 2; i <= n; i++) {
    for (j = 2; j \le n; j = j * 2) {
        k = k + n / 2;
    }
}
                                                                                                 (Medium)
Q4. What is the time complexity of the following code snippet?
int a = 0, i = N;
while (i > 0) {
    a += i;
    i /= 2;
}
Q5. What will be the time complexity of the following code snippet?
                                                                                                    (Hard)
for(int i=0;i<n;i++){</pre>
 i*=k
}
```
